"There have been so many hysterical cries and attacks, growing more and more violent as the end approaches, that it is hard to take this one seriously," said Edwin C. Dinwiddie of The Anti-Saloon League of America. "Of course it is an attempt to save New York from swinging into line with the other states for prohibition, but even if New York should be held back by the liquor interests, the prohibition amendment has every prospect of being carried; I am not saying that New York will vote against like to have it but can get on without

WHEN SERBIA BROKE **BULGARIAN FRONT**

Rapidity of Serbian Advance Created Impression of Half-Hearted Opposition, but Bulgars Were Unable to Organize

Special to The Christian Science Monitor LONDON, England - The recent memorable campaign in the Balkans had given to the world striking proof of the indomitable spirit of the Serbians. Their success was rapid and in its results overwhelming to their enemies. It is therefore interesting to consider some details of their offensive operations between Sept. 14 and 26. The allied plan provided for the concentration of a Franco-Serbian force on the Serbian second army front. The advantage of attacking on this front lay in the fact that a force advancing thence could cut both the enemy communicaons with the Vardar front at Krivolak or Demirkapu, and cross the rna, cutting the enemy communitions with the Monastir front at It is noteworthy that by Sept. 23 both these objects had been

The Serblan first army, which was on the left of the second army, could not advance until progress was made by the latter, for the ground on its ront was commanded by the posions dominating the Serbian center and right center. A rocky, precipitous ridge, Sokol divided the first and and Serbian army fronts. The whole region to be attacked, and the country behind it as far as the Vardar Valley, is mountainous and in parts covered by forests,

The difficulty of lateral movement nd the Serbian front is shown by the fact that to transfer the Morava livision to the second army front entailed a descent of 6500 feet into a icep valley and then a climb of between 5000 and 6000 feet, according to the points of its employment.

At dawn on Sept. 15, after one day's llery preparation, the assault on is high praise indeed. ad Serbian army front between Sokol and Vetrenik was carried Slavs ut by French and Serbian troops.

PEACE PROBLEMS FOR CONFERENCE

Dr. Le Bon Finds an Initial Difficulty in Amazing Suddenness of Political Transformations Now Taking Place

By special correspondent of The Christian Science Monitor

PARIS, France-Among the multitude of speculations and prophecies s to what may or should happen at the Peace Conference, and what Europe will be like when the sittings are complete and the grand decisions re effected, few attract a closer attention or one better deserved by the uthority of the writer than that put rward by the eminent jurist; Dr. Bustave Le Bon, under the title of 'he problem of the first difficulties ace." In the past Dr. Le Bon s frequently and with much public ation devoted himself to the Study the problems of the development European states in particular and rope, as a whole. In the course of a present-consideration of the new ope now being shaped Dr. Le Bon s a mountain of difficulties ahead, t the least of them arising from the plitting up of empires into small ites, according to the favorite sysof the hour by which every race, wever small, is to be permitted the disfaction of managing its own

At the outset he points out that one of the difficulties of the present situan lies in the fact of the amazing denness of the transformations hat are taking and have taken place. the past, he says, great kingdoms ve fallen, peoples have transformed heir institutions and changed their s, and brilliant civilizations have shed in their turn. But all these were effected slowly; the n Empire occupied some cenries in its break-up, and in reality, never wholly disappeared. Today it does not follow that Germany will are assisting in a series of catas- resume the obstinate pursuit of her which are so far removed dream of hegemony. She is in that all imaginable phenomena that phase of stupor when doubt has beages they might have been gun to shake her most solid beliefs. perhaps also those of Russia and had the right to be served by them. d at the summit of power, the seemed threatened with having nit to its laws, and in a few d up in shame and desolation.

re tremendous tomorrows, but what those tomorrows be? What is g to happen, for example, in Ausia, with this medley of small rival ns issuing from the mass of the powers that had collected them her after much effort. If the of the past may still serve as de, one might say that Europe hreatened with a series of wars g those waged since the Middle with the object of constituting small states the great empires which are in the way of being split up today. But the world has nged so much that the laws of the t no longer seem capable of apubmit to unforeseen transformations.

Austria, and as regards that country The organization of small states into which it is being divided will remain precarious for a long time. How can they be dealt with? The Allies would remain on the very day of the armistice, he preached the union of the parties.

The famous greatest combination of both in the world. To his camera and to the delightful volumes of Freshfield we owe the intimate knowledge that is now possible of Suanetia and Ossetia along the greatest combination of both in the world. Special to The Christian Science Monitor from its Western News Office CHICAGO Illinois-University of Conference A. A. basketball season defeated Purdue University 21 to 17 After scoring a free throw in the firs two minutes, Purdue never led again coming closest to it with an 8-to-8 tie

at the end of the first half. Chicago displayed a smoothness in passing and an alertness of working the ball up the floor that upset the Purdue game, driving the visiting team to attempt long shots. Capt. R E. Markley of Purdue was the most successful at this game, completing two spectacular field goals from midfloor in the second half, but the fast work of the Chicago scoring combination, with Capt. P. S. Hinkle and Robert Birkhoff leading, surpassed Purdue's best efforts.

The Chicago followers were elated at the result because their team kept its pace better than the 1918 team did in any game on the home floor last

NEW YORK HARBOR STRIKE AT AN END

Decision of Marine Workers to Return to Duties on Presenta-Is Reported as Unanimous

pecial to The Christian Science Monitor from its Eastern News Office

NEW YORK, New York-Striking arine workers in New York Harbor rere ordered back to work by their ders after a meeting on Saturday tht at the offices of the Marine forkers Affiliation, following the anment that, in accordance with President Wilson's cable message to it, the National War Labor Board ould reopen the case on Monday ng and that members of the oard were already on their way to

Thomas Delahanty, president of the fillation, which includes the six ons affected, said it was believed nat every one of the idle 1100 tugs. ghters and ferry boats would at once in to take care of the freight that and been piling up on the docks since the stoppage of traffic last Thursday due to the strike.

ident Wilson's cable message

"I have been informed by the Secre-tary of Labor as to the serious situan which has developed in the port ew York and the strike of marine vorkers which seriously crippled the ments of troops and supplies. I consider this a very grave emergency and understand that it has arisen bethe parties to the controversy ailed to make a joint submission to he National War Labor Board.

I earnestly request that you take his case again and proceed to ke a finding. I appreciate the honesty and sincerity of the board in aning on Wednesday that it could ot promise a final decision in the oversy without a formal submission from all parties, but I am sure CARGO OF NITRATES that the War and Navy Departments. he Shipping Board and Railroad Adon and any other governental agencies interested in the conoversy will use all the power which hey possess to make your finding ffective, and I also believe that priate boat owners will feel constrained n the present emergency to accept

Ithough the National War Labor revention of stoppage of war work this port. and the maintenance of production of materials essential to the conduct of e war, I take this opportunity also of saying that it is my earnest hope hat in the present period of indusrial transition arising from the war he board should use all means within te power to stabilize conditions and o prevent industrial dislocation and

Benjamin M. Squires, commissioner f conciliation of the Federal Labor rtment and chairman of the New York Harbor Wage Adjustment Board. sented the government's message the strikers, and the decision to return to work was said to be unani-York Boat Owners Association had ormally declared that they would not ubmit their differences to the board while Basil M. Manly was joint chairnan of it, because of Mr. Manly's alleged criticism of the owners for leclining to arbitrate the question of an eight-hour day.

Paul Bonyngo, counsel for the boat owners, issued a statement to the ffect that he doubted that private coat owners would accept the decision of the board so long as Mr. Manly remained a member of it, but governent representatives said that the board would come promptly to a deci-sion and that this decision, in accord-

ance with President Wilson's instruc-tions, would be enforced.

Army and navy authorities had al-ready succeeded in finding a large number of soldiers and sailors who ad had experience in such work and who could take the places of civilian strikers on tugs and ferries which the government had chartered and also various other small craft, in order that the work of the army and navy departments might go on.

Food was supplied to Brooklyn and ong Island towns by the railroads, and under supervision of the marine division of the police department, a certain amount of ferry service was maintained Saturday between Man-nattan and Staten Island. The Lackawanna Railroad also succeeded in operating nine of its ferry boats. Boats operated by the department of charies to carry supplies to the institutions on the islands in the East River also

In New York City, District Attorney Swann took a hand in proceedings by summoning to his office the strikers' mittee and announcing that to institute a strike among public em-ployees, such as men who operated he municipal ferry boats, was a miseanor according to the penal code and that whether or not the strike was settled he intended to sift the matter to the bottom. As this committee delared that it was not responsible for

The Little Earl Who cut with." All this time Cedric had been feeling in his pockets and now triumphantly pulled out a jackknife, which he waved at Dorothy.

Dorothy read the last page of her "or I'll never come and play with you

"Ob, dear! Oh, dear!" wailed Dorever so many times before, and she othy. "Dearest won't let you come knew, the ending by heart, but each again, if I do it; and, if I don't do it, time she felt the same joy over the you say you won't come. Whatever happiness of the storybook people and am I to do?"

"You've got nice short hair yourself," announced Cedric, "and you It was a golden afternoon. Dorothy know how nice it is that way. I should

the grass into the long ripples that out them, and your grandfather I can't do it.'

"Bother! Yes, you can, too. Please, please, please!" With each "please," Cedric beat on her arm with his two fists and just as, in desperation, Dorothy was about to take the knife in her hands, she found herself under the apple tree, rubbing her arm where an apple had just dropped down and hit it. The book in her lap was open to the last picture of Fauntleroy making a speech to the tenants. She seized size, was standing in front of her, the book and looked at the picture eagerly.

"Oh," she sighed rapturously, "there are his curls! I didn't have to cut bocker suit, with a red sash around them off, after all! I am glad he is a his waist, and a red necktie. He had real boy, and likes to play in his old a mass of tumbled golden curls, which clothes; but I couldn't bear to have

London's Famous Old Guildhall

Every one has read of London's famous old Guildhall, where President Wilson recently made an address, and in which important gatherings are constantly being held; but perhaps not Dorothy was delighted, but still every one recalls the wonderful history of this fine old building. In "A "I'm so glad you aren't an earl Child's Guide to London," Mr. A. A. today," she said. "I always feel more Methley writes:

The guilds of craftsmen became more and more rich and powerful as time went on, and they were very closely connected with the government of the City-indeed, the aldermen were banded together into a suild of their

The members of the "Knightenawfully hot coming up the hill guild," as it was called, had the Guildhall as their meeting place, and this Here Dorothy interrupted him with building has been the council hall of

There is no doubt that, bullish position on the market, al for the first 2% years of the war ti.e., before the United States be- mulation of stocks. came a belligerent) the financial reources of Great Britain were the very prop and stay of the alliance, The atored-up riches of a century were thrown into the melting-pot for the average business man is anythin the eaving of civilization. All the but cheerful. We believe, in a ver other allies looked to Great Britain for help in money, food and munitions. Far-away Russia required guns, blankets, boots and stores of orts. Great Britain had to proide them. So with Greece, Rumania and Serbia and all the British coloties. Even France at times had to stocks have given the best account of lepend largely on the same universal ovider, who, of course, had to scour the globe to procure what she could not deliver from her own stores. The result of these prodigious purchasngs in foreign countries was that the exchanges went heavily against Great Britain, and to rectify them she had to sell her vast holdings of foreign urities, chief among them being American railroad bonds and shares. The British holders of these securities, thus forced to part with them, had, of course, to be paid, and they were paid in war stocks and bonds. In this way indebtedness to foreign countries was exchanged for indebt- annual dividend of 21/2 per cent, pay ness to British subjects. This in able Jan. 31 to stock of record Jan. 21 tself was undoubtedly a cause of satsfaction, for one great object and has declared a monthly dividend of achievement of British finance has per cent on the common stock, pay en to keep the largest part of the able Jan. 31 to stock of reocrd Jan. 15

The method adopted for the raising of these vast sums was at first the ame as that of all the other belligerent nations, viz., by the issue of neriodical loans. The 31/2 per cent war loan of 1914 was followed by the per cent war loan of 1915 and the per cent and 4 per cent war loans of 1917. These loans together realized about £2,000,000,000. But the experience gained in these operations. showed that the method was not entirely satisfactory. Subscriptions were financed largely by bankers' loans. and this meant the gathering together of artificial credits and the consequent inflation of prices: a result which was prejudicial to the nation not only as consumer, but also as the purchaser of war material. Since that time herefore, a scheme has been adopted of having a loan in constant issue. The theory of the procedure is that as he government constantly pays out arge sums for the requirements of was this money is constantly seeking investment, and as remittance abroad and other issues of securities are practically forbidden, it perforce had be invested in the security offered by the government, to wit, national war bonds or treasury bills. over, it is argued, this method pre-

vents the wide fluctuations in prices caused by previous methods, and au-GREAT BRITAIN tomatically provides that what the government disburses returns to it practically intact, as provision for

further disbursements. Of the Enormous Amount Spent fairy tale, but in the circumstances of Since Beginning of Hostilities government control of issues of securities and a tight blockade of ex-Only 25 Per Cent Raised by port of credit, it is sound enough. At all events, during nearly two years of war the country has been saved the disturbing influence of a large loan, and has raised about £2,000,000,000

How the vast debt is to be consoliopened in 1914, Great Britain has dated and managed is a problem for peace to settle. But that the interest ent over £8,600,000,000. This total peace to settle. But that the interest payment is already well provided for in the existing budget is a satisfactory point for income taxpayers.

DEBT INCREASE OF THE NATIONS

Gross Indebtedness in Four Years Risen From Twenty-Seven Billion to More Than Two Hundred Billion Dollars

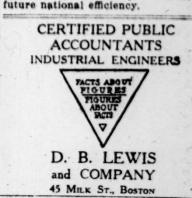

NEW YORK, New York-The gross indebtedness of the nations of the world has risen in four years from \$27,000,000,000 to more than \$200,000.-000,000, according to a statement issued by the Mechanics & Metals National Bank of New York, just made public. According to this statement, the indebtedness of the seven nations, which were chiefly engaged in carrying forward the great war, amounted to \$194,000,000,000 on Jan. 1, 1919, Great Britain and Germany having the largest debts of any of the belligerents, France being third after these countries, while next in turn were Austria-Hungary, Russia, the United States and Italy. The United States came into the war after the other nations, and that fact set it apart from the common trend, notwithstanding that war expenditures here from 1917 forward were more than those of any other single bellig-

According to the bank's figures, securities now outstanding against the seven nations which chiefly financed the war represent a sum greater than the developed wealth of any single nation of the world, other than the United States. They represent a sum six times as large as the deposits of all the banks of the United States, 12 times as large as all the gold and silver mined since the beginning of the world and 20 times as large as the value of the United States annual foreign trade.

The indebtedness of Great Britain. which in the middle of 1914 represented a mortgage equal to 4 per PROGRESSES WELL sents a mortgage equal to more than 44 per cent of that wealth. The in-NEW YORK, New York-With the debtedness of Germany, which in 1914

even here. A gross total of \$194.-000,000,000 for the countries given, acknowledges only the war indebtedness, as added to the indebtedness of 1914. It makes no allowance for obligations to be incurred for further military purposes, for the demobilizing of armies, and for pensioning them. Nor does it allow for the restoration and replenishment expenditures that will impose upon the nations the duty to incur further loans.

There will be, besides the expense of demobilizing the armies, the work of rebuilding and restoring, of housing on an unparalleled scale and of roadmaking. There will be the imperative need of agricultural development, shipbuilding and improvement of transportation, to say nothing of schemes of economic and social reform that are regarded as absolutely essential to

the people of the country will only learn how and what to buy."

UNITED STATES **BANKS EXPANDING**

National City of New York Opens Three Branches in Cuba and Plans for Several Others

ecial to The Christian Science Monitor

from its Eastern News Office NEW YORK, New York-The policy FURNISHED APARTMENT WANTED of the National City Bank to extend United States business and banking relations to South America, has been launched in the opening of branches in Cienfuegos, Matanzas, and Sagua la Grande, Cuba, according to an announcement issued by Frank A. Vanderlip, president of the bank. These branches are but the first of many which will follow in various Cuban cities, Mr. Vanderlip said. Two more branches of the National City Bank will be opened in Argentina shortly. which will make a total of 15 in Cen-

Mr. Vanderlip expressed his delight at the fact that the Associated Press and made arrangement with leading outh American papers for an exchange of news, as he is sure that this system will result in a better understanding between Americans, such as s necessary to strengthen business relations with those countries. According to Mr. Vanderlip, the banking relationship between the United States and South America is increasing constantly, and the prospects for South America are most encouraging.

The "dollar exchange" which has countries, including South America, is identified with the National City Bank. The foreign deposits of the bank are now greater than its entire deposits four years ago. That bankers in the United States are planning to handle

Firm Companionship

THE first public appearance of the new United States Ambassador to the Court of St. James, at a luncheon given by the Pilgrims Club, on Friday last, was memorable for two remarkable speeches, that delivered by Earl Curzon, representing the British Foreign Office, and that made by John W. Davis, the new Ambassador. It was obviously a great opportunity to lay once again before the English-speaking peoples of the world the. great things which the deepening unity of these peoples and achieved within the last few years, and of doing omething to lift the veil on the greater possibilities which lie before united action in the future. Lord Curzon might be trusted to contribute something memorable to such a work. Few men have had greater opportunity of undertanding the meaning, in various parts of the British Empire, of the white man's burden, and few men realize better the urgent need of all, who understand the necessity of shouldering the burden, giving their aid,

In a few clear-cut sentences, Lord Curzon placed the situation before his hearers; how they all stood together m the threshold of a new era; how they were faced with world problems which had never been surpassed in importance; how they had won the war, but had not yet won scace; how the winning of peace was the greatest constructive effort that had ever been imposed upon the shoulders of any peoples or combination of peoples; but how that task could be successfully confronted, if the United states and Great Britain stood side by side to shoulder the burden. Having thus indicated the task which lay before them, Lord Curzon proceeded to marshal, in a manner which was well worthy of the occasion, the long array of facts which went to show how eminently fitted the two peoples were to the work of sustaining that task. All orts of attempts, he pointed out, would be made to sow dissensions between the United States and Great Britain. Aready it had been started by German propaganda. there would be always points of differences of view between the two-countries, but he added, with fine simplicity, "they are merely as grains of dust in the balance of their international friendship.'

Thus Lord Curzon, in the great speech of the occasion on the British side, gave a great lead, and the new Ambassador to the Court of St. James did not fail to improve the opportunity thus afforded him. There was no mistaking Mr. Davis' sentiments. There was a freedom as well as an earnestness and simplicity about what he said which went to show how largely he shared, with all the great statesmen of the day, the desire for that straight recourse to actualities which is the characteristic demand of the hour. With a welcome ability Mr. Davis at once linked up his mission with the great mission of all who had preceded him. What he was going to say, he mplied, was not something new, but something which had been said, in part at least, with increasing distinctness by a long line of American citizens, both those who had officially represented their country in London and those who, in some unofficial capacity, had given expression to the fundamental unity existing between the two peoples. He pointed out how, time and again in the past, these men had dwelt upon the community of ideas which bound them together, their literature, their history, the story of the trials endured and the battles won by their common ancestors, and above all the common ideals of justice and liberty which inspired their common aims. And having said so much, with a quick determination to remove from such an enumeration of the bonds of unity any suspicion of platitude, Mr. Davis emphasized the fact that if such sayings were trite and familiar themes, they were only trite and familiar as all great things must inevitably be. "Such things," he said, "cannot be too often repeated, and had I the opportunity I would say to every American and would repeat to every Briton, 'These are indeed your kinsmen; study them, understand them, learn to give and take with them, and guard their friendship as a sacred thing."

It was, however, in what followed that Mr. Davis displayed, perhaps, to its greatest advantage not only his ability/as a speaker and statesman, but his discernment as a student of history. It was a peculiarly felicitous thought of the new Ambassador at the Court of St. lames to draw the picture he did of how the people of the United States had looked on with, as he out it, increasing wonder at the work of Great Britain during the war; how they had watched Great Britain from the fateful days of August, 1914, when she made her prompt decision, when, in support of herpledged word to martyred Belgium, she threw into the trembling scales all that she had and all that she might hope to be. He told how the heart of the American people had gone out to them in earnest sympathy, undertanding as they did that "God helping, they could do no other." And then he told how they had watched the British army throw itself across the Channel and fight its way through four long years, "all the way from Mons to Marne, and back to Mons again"; how they marveled is the numbers grew, in spite of the waste of constant fighting; how they watched the gathering together of the great dominions from the four quarters of the globe; how they witnessed the allied fleets holding the seas against the foe; and looked on with growing wonder as British men nd women at home gave up, not only all their ease, but all their most cherished liberties, and spared themselves no labor, however menial, and no privation, however great, that might help in the glorious cause. "Is it too much," Mr. Davis said, in a sentence which might be taken to represent a whole nation's desire to give honor where honor is due, "Is it too much to paraphrase the words of Pitt and say that England has saved herself by her exertions, and may well have saved the world by her

How America profited by this example, how she threw herself whole-heartedly into the great struggle, sparing

nothing but giving all, Mr. Davis outlined with that gracious reserve which served at every point with his hearers, who understood to the full the magnitude of America's effort, to place the whole issue before them with a clarity which could not have been bettered. Then having carried the matter thus far, Mr. Davis proceeded to gather up the threads of his story. They had achieved victory, complete, overwhelming, satisfying, and adequate; but a still greater victory remained to be achieved, and as the two English-speaking peoples had fought side by side they would remain side by side in the great settlement which was to follow. He pointed out that they were already agreed upon the broad outlines that such a settlement must take, and in matters of detail he felt convinced that they would be in equal harmony, because the same great ideals and purposes animated both Great Britain and the United States.

When he turned aside, at this point, to summarize what these ideals and purposes were Mr. Davis reached perhaps the highest point of his effort, for he carried the whole issue quite away from the thousand and one ties which, relatively speaking, might be said to form the bonds of unity, and showed the impregnability of the Anglo-American position to rest upon its foundation on Principle. "As has been finely said," he declared, "this we may know certainly, this we may hold to confidently: that which is right can harm no man; that which is wrong can profit no man; though all other lights swing and circle, this is the pole star by which we may safely steer." From this standpoint the view is as wide as may be had, and Mr. Davis did not fail in presenting it to those who heard him. It is, indeed, in this spirit that the two peoples mean to strive for justice and to exact it, and it is, indeed, with this justice, and by very reason of it, that they plan for a broader freedom, for themselves and for all mankind. As Mr. Davis so justly summarized the whole matter: "It is the promise of these things which reddens now all the morning sky, and it is in the light of this new day that Great Britain and the United States are to walk, God helping, in unshaken trust and firm companionship.'

The Debate in the Spanish Cortes

Now that full reports of the momentous debate in the Spanish Cortes, which preceded the fall of the Coalition Cabinet, are available, it is not difficult to see how the much-heralded ministry of "All the Talents" found it impossible to survive the storm. For many months and even years past, in Spain, one government after another has devoted itself to the task of suppressing public opinion, and, by means of the most rigorous press censorship and such acts as the notorious Espionage Bill of last summer, of securing an appearance of unanimity in public affairs which was very far from having any real existence. The world events of last October and November, however, were such that no artificial system could withstand them. In Spain, as everywhere else, they had a short way with makeshifts and there quickly sprang up a demand for a sincerity in government quite unwonted in Spanish politics. Such demands came from all quarters. The utter failure of the policy of neutrality at all costs, left its sponsors seriously discredited; and when the Cortes met, and the debate opened, the storm broke, as was almost inevitable.

The debate was remarkable not simply because of the or with which it was carried on. Vigor in a debate in the Spanish Cortes is not exactly uncommon. It was remarkable rather because of its extraordinary effectiveness. The debate afforded the first real opportunity the opponents of a reactionary policy had had of expressing themselves, and through their spokesman, Señor Romeo, they certainly found effective expression. The chief point of Señor Romeo's attack was, as might be expected. the government's policy toward Germany, particularly in its last phases, namely, the way in which it dealt with the question of the seizure of German ships. With remorseless accuracy the able Liberal deputy covered the whole ground of the whole sorry business; denounced the government for its dilatory and uncertain methods; pointed to how it had apparently summoned its courage at one stage to send an ultimatum to the German Government, but when Berlin, with a contemptuous disregard, simply ignored the Spanish Government's existence, the Spanish Government allowed the ultimatum to lapse. From the question of German ships, Señor Romeo went on to denounce the whole attitude of the government, which he declared treated the Cortes as if it were a flock of sheep; disguised the actualities of every situation; blundered in regard to Morocco; and blundered in regard to the attitude of Spain toward the war; whilst all the time, through its leader, it harped on the question of patriotism; patriotism. Señor Romeo declared, by which they had lost all sense of shame.

Señor Romeo, however, did not confine himself to mere destructive criticism. One of the most enlightened Liberals in Spain, he is far too good a statesman to leave the matter at that. Toward the close of the debate, he made an earnest appeal to the Count de Romanones to abandon the secrecy and subterfuge which had characterized the attitude of the Coalition Cabinet, and, if he would continue a leader of the people, to come out and state clearly his position. Whilst it is not possible certainly to connect the two, there can be little doubt that Señor Romeo's attitude, and the broad support which it secured in the Chamber, was largely instrumental in. deciding the Count de Romanones to take this course; to come out, as Señor Romeo asked, and, courageously breaking with former traditions and colleagues, make, as apparently he is making, a whole-hearted effort to rehabilitate the world policy of Spain.

Providing for the "Barroom Crowd"

Many well-meaning people are solicitous as to the conditions likely to confront those in the United States who now resort to barrooms when national prohibition shall be in force and the barrooms shall all be closed. "What," they ask, "shall take the place of the barroom?"

It is overlooked, in the first place, that prohibition already prevails throughout by far the greater part of the United States, although it may be questioned whether it

yet affects the greater part of the population. Taking the nation at large, 2546 of its counties are dry, while only 351 of them are wet.

The problem of finding a place for "the barroom crowd" when the barroom is closed, therefore, if it can be considered as a problem, may reasonably be said to have already arisen for solution, and to have been met somehow, in a great number of communities. One does not hear of it in places where prohibition prevails; one hears of it only where prohibition is expected. The fact is, the "barroom crowd" disappears with the barroom.

The fundamental mistake made by the people who would provide, under prohibition, for the "barroom crowd" is to be found in the assumption that there is such a thing as a "barroom crowd," or a crowd that resorts to the barroom with the view of mixing with congenial society. The attraction of the barrooms is alcohol; the social cementing force operating in the barroom is alcohol; it is alcohol that reduces the habitué of the barroom to the level of his fellows in the barroom; take the alcohol completely away from the individual barroom habitué and he ceases to resort to the barroom; remove alcohol from the barroom, and the crowd that formerly resorted to it will resort to it no more, for its attractive feature has disappeared; deprive the "barroom crowd" of its cementing fluid and it will disintegrate.

The great majority of the victims of alcohol are unwilling victims. It is not the barroom, or the bartender, or the "barroom crowd" that draws them to the saloon, but simply the liquor habit which the saloon encourages.

A sober man finds no companionship in a "barroom crowd," a "barroom crowd" finds no pleasure in the presence of a sober man. The tie that binds the "barroom crowd" is the cup that destroys all the finer feelings of men.

Nothing can take the place of the barroom, for it has no place in the social life of any class apart from the liquor it dispenses. When the liquor is out of the barroom, the crowd itself, freed from the baleful influence of liquor, seeks other means of entertaining and amusing itself and is a "barroom crowd" no longer.

It is a crowd no longer, and demands no attention as a crowd. It becomes diffused with the mass of the people, and the only way to reach it is to reach it through dealings with the mass. Under prohibition what is good for all the people will be good for those who once constituted the "barroom crowd."

Savings Banks

THE observation of the centennial of a savings bank in Salem, Massachusetts, calls attention to the fact that the establishment of institutions of this character in the United States was not long delayed after the Rev. Henry Duncan of Ruthwell, Scotland, set going a movement for their introduction into Great Britain, in 1810. In fact, the actual beginning of savings banks regularly in the United Kingdom and in the United States was practically simultaneous. Such institutions, however, it is fair to say, originated in Germany half a century or so earlier, the first in that country having been opened to the public in 1765 in Brunswick. Jeremy Bentham, in the meantime, however, had proposed a system of what he called "frugality banks" in England, and Lady Isabella Douglas established in Bath, early in the last century, a savings institution for domestic servants only. But it is the Rev. Henry Duncan's type of savings bank that survives, little changed by the passing of more than

The Rev. Henry Duncan was a Presbyterian minister, and he was led to investigate the subject of practical thrift by reading a treatise on economics by another Scot, John Bone. This inspired him to write "An Essay on Parish Savings," which he published, and which helped to win attention for his plan. In this pamphlet he described the result of his efforts to benefit working people by paying them 5 per cent on savings deposits. The experiment had led the wage-earners to save some part of their income weekly, and a consequence of the saving was the cutting of expenditure in the public house, which, in turn, rendered them, by reason of abstinence from drink, capable of doing better work and commanding a higher price for their labor.

The British Parliament gave first recognition to savings banks in 1817. The legislation then provided was, however, virtually repealed by the Savings Bank Act of 1828, under which was organized the system of savings institutions, since and now in operation throughout Great Britain and Ireland.

The first savings bank organized in the United States is credited to New York, the date given being November 29, 1816, but Philadelphia claims precedence in having actually opened its first savings bank for business on December 2, 1816. Nevertheless, the first savings bank to be incorporated in the United States was a Boston institution, the charter of which bore the date of December 13, 1816. It is to this institution the Salem bank's centennial brochure refers, no doubt, when it says: "The Salem Savings Bank began business less than two years after the incorporation of the Provident Savings Institution in Boston, and less than seven years after the establishment of the first savings bank in the world." To this it adds: "To Massachusetts belongs a double honor; for the Commonwealth has not only the first incorporated savings bank in America, but also in the world, and here also is the second incorporated savings bank, the Salem Savings Bank." The petition to the General Court filed by the incorporators of the last-named institution has an air of quaintness that cannot well be ignored. It reads:

Whereas Provident Institutions for Savings have been found highly useful in Boston and other places where they have been established, we the Subscribers hereby agree to become members of such a Society for the Town of Salem, to be extended to the vicinity if it shall be thought expedient. The object of the Society is to receive deposits of money from such persons as may be disposed to make them, and to use and improve the same for their benefit, according to the principles of such associations, and under such regulations as may be hereafter agreed upon by the Subscribers, pursuant to the provisions of an act of Incorporation if it can be obtained.

After 1818, charters for savings banks, not only in the United States but throughout the world, came thick and fast. Since then there have been many variations in organized methods of thrift, and almost unlimited opportunities for the making of small investments. Most of these, on their face, would seem to divert savings into other channels, and yet the savings banks have continued to multiply and to prosper. What some thought might be the greatest blow ever administered to those institutions, the establishment of postal savings systems in the leading countries of the world, did not, apparently affect them at all. Since 1820, the year in which statistics of savings were first compiled in the United States, the annual deposits in those institutions have grown from a total of less than \$9000 to nearly \$6,000,000,000. The postal savings banks have not apparently cut in upon them; and while at this time figures are not readily obtainable, it is believed that savings bank deposits for 1917-18 will show no falling off, and certainly no serious diminution by reason of the absorption of money by the Liberty loans.

A point that has been added to the long list of credits readily accorded savings banks in recent years is that they aided very promptly and effectively in meeting the calls of the nation for credits during the period of the war.

Notes and Comments

It is interesting to learn that state foresters in the United States are reporting many applications from returning soldiers for outdoor work. Professor F. W. Rane, State Forester of Massachusetts, points out that forestry gives immediate employment, and is not dependent upon a great outlay of money. There is judicious cutting to be done while the winter lasts, and extensive planting awaits the spring. Here is work which needs to be performed, while men to undertake it are coming into the labor market much faster than are taken care of, as may be judged from the report made by the chairman of Boston's labor board that only 61 out of 571 applicants had been placed in positions. It will be easier to forestall a serious labor situation before it comes than to meet it afterward, yet neither the state nor the federal authorities seem to be acting very rapidly.

There are plenty of chrysanthemums in the flower shops of Paris this winter season, but they are sold at a prohibitive price, anything between two and ten francs being charged for a single bloom. It is said that they were never more expensive, even during the first years when they became known in France, when the chrysanthemum was regarded as a great rarity. It was in the autumn of 1808, over 100 years ago, that the first bunch of chrysanthemums was seen in Paris, brought by a Frenchman from far-off Japan. His first care was to present them to the Empress Josephine, who was delighted with the flowers, and introduced their cultivation in French gardens.

AN ARTICLE in a Western newspaper, speaking of the hard lot of the American Indian wife, called forth, the other day, a letter from an educated Indian woman to point out how little the writer of the article knew about Indian domesticity. Far from becoming a drudge and slave, the Indian woman, when she married, became "a wife, a companion, doing her acknowledged share for the life of her people, just as her ancestors had been accustomed to do for ages." The wife kept the tepee, cooked, made clothing, and attended to the spiritual education of the children; the husband tilled the soil, hunted, and did the heavier kinds of handwork about the home. More than that, women were treated with high respect, and took part in elections and councils, "the only government in the world," says this modern Indian woman, speaking for Indian women of the past, "in which woman suffrage was granted and given a full chance to develop."

It was Mr. Gerard, was it not, who said that a revolution in Germany would make the French Revolution appear the veriest picnic. Whether this prediction is to be fulfilled or not is one of the secrets which the next few months will probably unfold. The former United States Ambassador to Germany is not alone in his opinion. It is shared, in fact, by no less a man than Heinrich Heine, who has a remarkable passage on the subject of what he foresaw would happen in Germany. It occurs in the Callman-Levy edition of his book "L'Allemagne." Heine warns the French neighbor to be guarded when he witnesses tumult over the border. Neither fan the flame nor extinguish it, he says; you would risk burning your fingers.

"Do Not mock at this advice, and beware of the Kantists, followers of Fichte and others." Thunder in Germany has a Germanic deliberateness, Heine admits, but "when you hear a rending such as was never before heard in the world, you will then know that German thunder is reaching its climax. Then will the eagles fall and the lions in the furthermost corners of the wilderness slink into their dens. A drama will be enacted in Germany which will make of the French Revolution an innocent idyll."

THE exact manner in which the news of the signing of the armistice reached Downing Street, and Mr. Lloyd George personally, has not yet been related. Palmerston's mighty cheer, which could have been heard across the Park, on being told of the fall of Sebastopol, is part of the current history of the period. Lord Panmure's secretary ran over from the War Office to the Foreign Office and pushing by numerous messengers who tried to bar his way up the stairs, he went up and knocked at the door himself, being answered by Lord Clarendon; and then followed the view-halloa of the irrepressible Prime Minister.

Holders of United States war savings stamps who may have incomplete books need feel no anxiety for that reason. They will have value at maturity. The Assistant Director of Government Savings, Vernon Monroe, advises that these stamps be held and carefully preserved until they mature in 1923. The counsel often given with regard to the war savings stamps, that they be put away and temporarily forgotten, holds good also with relation to Liberty bonds. There is an evident and concerted movement among promoters of questionable enterprises to separate holders from these engravings, and this movement should be determinedly resisted.
